

Our Mission

Since 1995, TTM has been and continues to be part of the growth, change and support of transactional messaging middleware. TTM's level of professionalism produces products and provides services in a manner that is consistent with ISO and world class standards.

With a minimum of 10 years developing and maintaining commercial software systems, our engineers have embraced many programming languages and relevant technologies, while solving customer requirements and support with 100% satisfaction.

*Transactional management,
integrity and security is
a vital part of the IT solution.*

*TTM provides middleware services
for some of the
world's largest corporations.*

Products and Services

TTM provides software, support and enhancement solutions for OEMs and customers where Message Oriented Middleware is mission critical.

TTM's deep technical expertise and experience with enterprise class Middleware enables customers and partners to confidently depend on solutions based on Apache ActiveMQ, TOP END and other Middleware. TTM also helps you integrate your existing Middleware investments into the Web environment with consulting services and tools.

Top End Middleware Products and Services
